ANSWERS WITH INTELLIGENCE

“I absolutely
LOVE my
PHONE
SYSTEM”

Daniel Holladay
Chief Technical Officer,
Outa Knoware International

WE BUILT TALKSWITCH® ON A SIMPLE IDEA; THAT SMALL BUSINESSES DESERVE AFFORDABLE TELEPHONE SYSTEMS THAT ARE AS SOPHISTICATED AND POWERFUL AS BIG BUSINESS SYSTEMS.

TalkSwitch delivers. It comes complete with everything you need to handle calls with a professional image, reduce your communication costs and stay connected everywhere. It packs an amazing range of features into one compact, easy-to-use package, including auto attendants, voice-mail, and powerful remote extensions. And TalkSwitch is a hybrid system that lets you access the traditional phone network and VoIP in one system, making it ideal for small, multi-branch and home-based companies with 1 to 64 phone users per office.

BETTER CUSTOMER SERVICE, IMPROVED PRODUCTIVITY, ENHANCED COST CONTROL
Answer your calls with sophisticated multi-level auto attendants and dial-by-name directories. Connect to off-site and mobile telephones as though they were on-site extensions. Seamlessly pick up your calls

wherever you are. Plug in to VoIP with your standard phones. And more. TalkSwitch systems give you uncompromising phone features at unbeatable prices.

GROW YOUR OWN WAY

From bustling multi-branch businesses to single-person home-based start-ups, there's a TalkSwitch system that fits. Moving from a traditional to a hybrid system with Voice Over IP (VoIP) is simple, and you can choose analog or IP phones.

FIELD-TESTED. IN A WIDE VARIETY OF FIELDS.

TalkSwitch has proven itself in thousands of businesses and institutional settings; financial services, real estate offices, consultants, computer services, retail stores, schools and many more use TalkSwitch. And love it; ninety-five per cent of TalkSwitch owners say they would recommend the system.

FULL-FEATURED, ALL-IN-ONE SYSTEM

TalkSwitch is a complete system that includes all the features that other solutions may charge extra for: auto attendants, voicemail, advanced remote extensions, sophisticated call routing and queuing capabilities and much more. Unlike many systems on the market, you don't need added modules or extra purchases to get your TalkSwitch system fully and professionally functioning for you.

REMOTE EXTENSIONS IMPROVE PRODUCTIVITY, IN AND OUT OF THE OFFICE

All TalkSwitch systems include innovative remote extension capabilities with advanced call handling for remote cellular, wired and cordless phones. Any phone, anywhere, can be added as an extension of your system. TalkSwitch remote extensions are more than simple call forwarding; calls can be transferred, screened and even conferenced. Your work doesn't stop at the office, and neither does your phone system.

UNBEATABLE PRICES

In addition to the low initial price, TalkSwitch systems maximize your use of telephone company lines and, with VoIP-enabled systems, your broadband Internet connections. Further savings on long-distance bills come through the system's unique Call Back/Call Bridge functions and VoIP-based inter-branch calls. You can move staff around or change your configuration on your own PC as well, minimizing service charges. And TalkSwitch works with standard analog phones, which means you can use your existing phone sets.

TALKSWITCH TELEPHONE SETS

TalkSwitch analog phones are designed and programmed specifically with the system in mind, so if you do need phone sets, they're made to order. TalkSwitch phones include everything you need in a business set.

EASY TO SET UP, CONFIGURE AND MANAGE

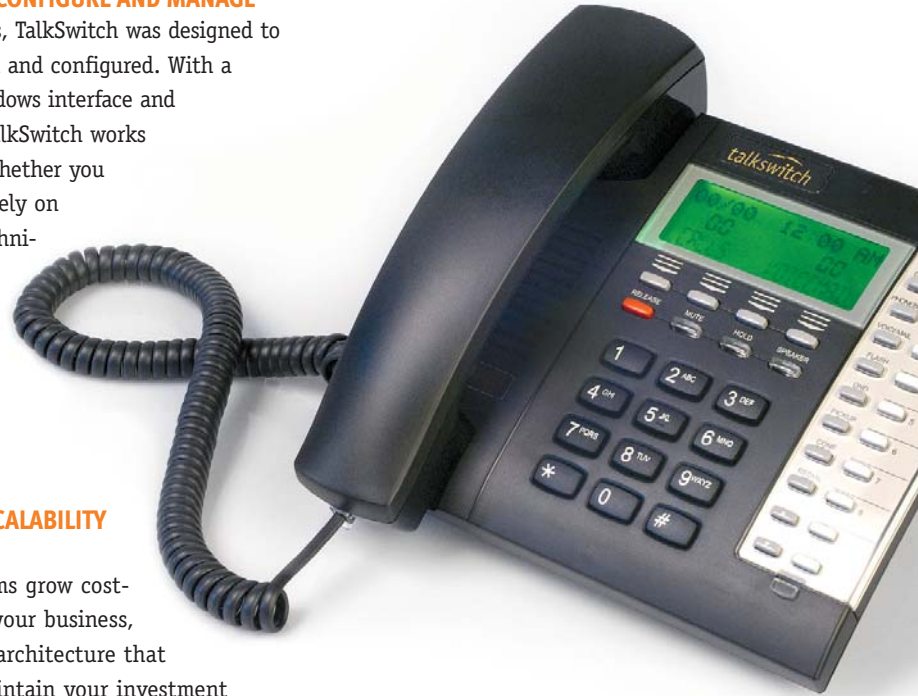

Unlike other PBXs, TalkSwitch was designed to be easily installed and configured. With a user-friendly Windows interface and standard ports, TalkSwitch works out of the box. Whether you do it yourself or rely on a professional technician, TalkSwitch installation and configuration is made to save you time and money.

OUTSTANDING SCALABILITY AND FLEXIBILITY

TalkSwitch systems grow cost-effectively with your business, using a modular architecture that allows you to maintain your investment as your company evolves. Systems start at 2 lines with 4 local and 10 remote extensions and grow to 16 lines with up to 64 local and 40 remote extensions. Multiple locations? No problem. TalkSwitch seamlessly connects your teleworkers and branch offices. And businesses with long-distance branches can take advantage of VoIP to save on phone bills.

VoIP AND PSTN, ANALOG AND IP: THE BEST OF BOTH WORLDS

Telecommunication networks are evolving rapidly with the emergence of VoIP, and your phone system has to adapt. TalkSwitch offers the ideal hybrid for small business, functioning with analog or IP phones and connecting you to both the traditional Telephone network and to VoIP for inter-branch calling and access to VoIP-based services. If you don't need VoIP yet, you don't pay for it, but you'll be ready; even the entry-level TalkSwitch systems can be upgraded to include VoIP capability.

“With TalkSwitch, a small, fast-growing business can build its **PERFECT PHONE SYSTEM** easily and quickly, and that saves a lot of money.”

Feyzi Celik,
President and CEO,
OnePIN, Inc.

GET TALKSWITCH

For information about the system configuration that best suits your business, contact your local TalkSwitch Authorized Reseller.
